— WHO WE ARE

Built for the *real world* of business

Villva is a **cloud-native ERP platform** engineered to give manufacturers, distributors, and service enterprises a single, unified operating backbone.

Born from the on-ground challenges of industrial operations, Villva replaces fragmented spreadsheets, legacy software, and disconnected teams with one intelligent, role-driven platform - connecting every function from CRM to Finance.

Designed as a **scalable SaaS product**, Villva serves businesses of every scale with strong customer data separation, configurable workflows, and deep integration capabilities across industries.

Scalable for Any
Industry

— OUR VISION

Four pillars behind *everything* we build

Scalable Architecture

Designed from day one to grow with your business - from a single entity to a multi-branch enterprise.

Secure by Design

Secure authentication, role-based access, and strict customer-level data separation at every system layer.

Fully Configurable

Every workflow, approval chain, and report adapts to your business - not the other way around.

Decision Ready

Live dashboards give leadership real-time operational clarity and exception alerts at a glance.

One Platform. One Data. One Truth. - *empowering every team*

THE CASE FOR CHANGE

Why businesses choose *Villva*

WITHOUT AN ERP

- ✗ Data scattered across Excel sheets and teams
- ✗ Finance receives information late or incomplete
- ✗ Informal approvals with no audit trail
- ✗ Manual reporting cycles and repeated delays
- ✗ High dependency on key individuals
- ✗ Disconnected teams and information silos

WITH VILLVA ERP

- ✓ Single source of truth for all business data
- ✓ Real-time operational visibility across every team
- ✓ Structured approvals with complete audit history
- ✓ Live dashboards and automated analytics
- ✓ Scalable, process-driven operations
- ✓ Integrated departments on one platform

CORE MODULES

Everything your business needs, *built in*

CRM

Lead tracking and opportunity management

Sales

Quotation to delivery and dispatch

Purchase

Vendor management and PO workflows

Inventory

Live stock monitoring and tracking

Production

Item Master

Product master, HSN codes and variants

Support

Ticket management and resolution

Reports

Real-time dashboards and analytics

Service

AMC tracking and service history

Assets

Asset lifecycle and maintenance

Villva modules work **together as one system** - not as separate tools bolted together.

Integrated

Real-Time

Scalable

TECHNOLOGY STACK

Enterprise-grade infrastructure

AWS Cloud Infrastructure

Hosted on AWS with scalable compute, managed delivery services, and cloud-native operational flexibility.

Modern Application Stack

A Go backend with dedicated Next.js applications for ERP Admin and ERP Client experiences.

Reliable Data & Caching Layer

PostgreSQL for transactional data, Valkey for fast caching, and durable object storage on Amazon S3.

Event-Driven Processing

Temporal for workflow orchestration, Redpanda for messaging, and Amazon SES for email delivery.

EXPECTED BUSINESS IMPACT

Measurable outcomes

Organizations implementing Villva gain operational clarity, reduced manual effort, and faster decision-making across every department.

Faster Approvals

Structured approval chains replace informal sign-offs with full traceability

Reduced Manual Work

Automated reports replace time-consuming daily Excel routines

Inventory Control

Live stock visibility eliminates overstock and stockout risks

Leadership Visibility

One screen for all KPIs, live status, and business exceptions
